

Allegheny Health Network Emergency Medicine Management is a joint venture of US Acute Care Solutions and the Allegheny Health Network (AHN). Formed to meet the emergency medicine needs of AHN and its affiliated hospitals, AHNEMM aligns physician, hospital and payor to do what's best for patients by creating high-quality, innovative and efficient models of care.

USACS was founded by like-minded, physician-owned groups to provide a stronger, more stable platform for physicians who value physician ownership and leadership. Ownership provides for real participation in decision making and working together with a focus on the highest quality care and work environment. This has led to the development of our unique culture. Partnership in AHNEMM includes partnership and US Acute Care Solutions and access to all of both organization's resources.

This culture is rooted in a simple mission: To care for patients. Located in more than 200 hospitals in 20 states, we offer both the flexibility and resources to help you reach your goals. Learn more at www.usacs.com.
